Highway Speed Limit Now 50 MPH

Notice is given the public today by the State Highway Department that the speed limit on Arkansas highways has been reduced to 50 miles an hour. Arkansas formerly operated, first on the universal-speed-rule with no fixed limit, and then on a fixed limit of 60 miles an hour—now cut to 50.

The 50-mile speed limit will be enforced for a trial period of 120 days, after which, presumably, accident figures for the period will be studied to determine whether this limit has been helpful.

Arkansas has had a tremendous increase in fatal accidents this year, her rate of increase being the third highest in the nation.

Certainly the new speed limit deserves a thorough trial. But it should not be overlooked that other factors also contribute to peril on the highway—parking vehicles in the traffic lane, entering a state highway without first coming to a full stop, and passing a car on a curve or hill, all of which are flagrant violations of the highway code in every state.

The most flagrant violation in Arkansas today is the passing of cars on curves and hills. We have called attention in previous editorials to the fact that Arkansas has not yet installed "no passing" zones, with the warning double-stripe in the center of the highway. . . . And it's high time this was done.

Know-How Comes in Handy

You might argue that no serious activity of human beings is useless. Somewhere, sometimes, somehow, the most abstruse of skills, the most unpractical of knowledges may come in awfully handy.

Vilhelmur Stefansson spent a lifetime prowling around the waste spaces of the Arctic. He believed they would one day be valuable spaces, and that it was worth while to spend a lifetime learning all about them. Lots of people just shrugged and said it was a queer way to spend a lifetime, and forgot about it. Admiral Byrd made airplane explorations of both Polar regions, and twice spent entire winters in the Antarctic. Lots of people said it was a capricious and foolish way for a man to put in his time. But Stefansson knew what he was doing, and Byrd knew what he was doing, too. A couple of hundred thousand American soldiers are going to benefit from what they learned of life in the cold regions of the earth.

With announcement that several more bases are to be established in the North Atlantic, it becomes clear that the permanent military establishment in the outlying bases is going to be considerably larger. Peculiar health problems are involved. It is necessary to know the kind of clothing and food he provided; that the limits of what man can do and can not do in those rigorous climates be defined. What Stefansson and Byrd have found out in regard to those matters is available to the U. S. Army, and it may save thousands of lives. What Byrd learned about airplanes and their operation in his Polar flights may be very serviceable indeed to the Army, Navy and Coast Guard flyers in these days.

For years the Pan American conferences have been discussing health measures—joint control of yellow fever, plague, malaria. It might have seemed that the United States was not benefiting very directly. But now our soldiers are going to Central America, the Caribbean, and the shoulder of South America, to man new bases and outposts. Every bit of effort in the past, every scrap of knowledge gained concerning the peculiar health problem of the tropics may now come forward and save American lives.

Great peoples always owe a debt to the few individuals among them who can see farther ahead than the general limit of vision, and who are willing to work unrecognized and even rebuffed against the time when the rest catch up with them.

In India, experimental roads have been constructed of molasses and coal tar.

Cranium Crackers

Nations' Names
War news has brought the names of nearly every country in the world into print in the past two years, but few of these nations are familiar when called by their true names. Do you recognize the following nations' names, listed as they appear in their own tongues?

1. Kingdom of Hellas and Regno D'Italia.
2. Suomen Tasavalta and Sverige.
3. Bgariya and Magyar Ország.
4. Republica Boliviana and Miss.
5. Nippon and Chung-Hua Min-Kuo.

\$2,000 Awarded in Auto Case

Negro Acquitted on Charge of Operating Still

A judgment of \$2,000 was awarded Mrs. A. R. Smith in circuit court late Wednesday afternoon for injuries she suffered as the result of an automobile collision with a truck owned by the South Arkansas Grocery Company. Her husband received \$100 to cover costs of medical treatment for Mrs. Smith, and for damages to his automobile.

Willard Adams pleaded guilty before Circuit Judge Dexter Bush Thursday morning to a charge of reckless driving. He was fined \$20 and costs.

In the case of the State of Arkansas vs. John Trotter, the judgment of the lower court was affirmed. R. Pugh pleaded guilty to burning without notification, and the case was dismissed on payment of costs.

A jury acquitted Henry McMorris, Blevins negro, on charges of operating a still on his farm near Blevins. The still, which was discovered by Police Chief F. V. Haynie, Deputy Town Middlebrooks, and State Policeman Harold Porterfield, was said to have been located about 125 feet from the farmhouse where the negro resides.

Witnesses for the state included the three officers.

Reigh Nevins, Jim Bourke, Bob Davis, and Edgar Avery, all of near Blevins, were witnesses for the defendant.

A Thought

Chiefly the mould of a man's fortune is in his own hands.—Bacon.

Soviet Union Is Finished Nazis Assert

Say Red Armies at Bryansk, Vyazma Facing Annihilation

By the Associated Press
Adolf Hitler's press chief declared Thursday that the "Soviet Union is militarily finished" and that the 10-day-old war on the eastern front was virtually decided with nearly one million Russian troops caught in two vast encirclements in the German drive on Moscow.

The pronouncement which did not elaborate any details of land gains came from Dr. Otto Dietrich who arrived in Berlin direct from the Nazi field headquarters.

"From the springs of the Volga to the sea of Azov" he asserted "remnants of Soviet armies are in retreat everywhere."

Government Said Fleeing
The Berlin radio broadcast a Shanghai dispatch quoting Soviet quarters as reporting that the Russian government was fleeing Moscow but the report was not confirmed elsewhere.

A special bulletin heralded by fanfare of trumpets over the German radio said Russia's battered Red army had not a single division left fully fit for battle on the entire front.

"Attacked from the rear by strong armored forces three enemy armies must expect annihilation also in the area of Bryansk", the high command asserted.

Together with units already encircled at Vyazma Marshall Timoshenko has here sacrificed the last fully able armies of the total Soviet front, the bulletin said.

Bryansk is 220 miles southwest of Moscow and Vyazma is 125 miles west of the capital. They are about 130 miles apart.

Dr. Dietrich said between 60 and 70 Russian divisions—900,000 to 1,050,000 troops hopelessly bottled in the Bryansk and Vyazma sectors and were facing annihilation.

"Once destruction has been completed the campaign will develop as we wish," the reports said.

Nazis Warn British
He added a warning to Britain: "Let the English attempt a landing in Norway, Holland, Belgium or along the French coast and they will know what reserves we still have."

While the German proclamation a climatic turning point the Russians acknowledged they had withdrawn from Orel, 68 miles southeast of Bryansk on the Moscow-Khar'kov railroad but gave no intimation of complete collapse.

The mid-day Red army bulletin said Marshall Timoshenko's forces on the central front were still battling fiercely against the Nazis in the Bryansk and Vyazma sectors.

Tass, Russian news agency, indicated that Soviet troops still held Vyazma.

Russian planes, the agency said, concentrated heavy blows on enemy tank columns which managed to break through and struck telling blows at one such column.

Russian civilians are reported now to be fighting shoulder to shoulder with Red army soldiers to stem the Nazi smash toward Moscow.

German pilots said snow was falling behind the front line.

The German command is throwing into the battle division after division, the Soviet bulletin said.

"Our units are putting up fierce resistance to Fascist troops and are striking heavy blows," the Russians reports.

British Show Concern
LONDON —(AP)—Germany's mighty new drive toward the heart of Russia—impervious armies that guard Moscow—was viewed with mounting concern by Britain Thursday who saw no real hope of easing the pressure of their Soviet allies by reopening a west land front.

With supplies as their chief means of aid Britain and U. S. envoys arrived back in London loaded with data on Russia's needs and pledge to deliver the goods.

Newspapers took the view that the first few weeks would decide the fate of Russia's main armies now locked in the mightiest battle in history.

Authoritative sources declared the twin drives Hitler launched north-west and south-west of Moscow in a race with winter had created a pocket in which vast forces might be trapped.

British sources heard that Germany was hurling every land and air weapon against the Red army stand on the central front.

Belief was expressed that Russia had rushed up a vast amount of equipment even down to flame throwers to fight the Germans.

100,000 Jobless Expected to Walk Detroit Streets This Winter as Defense Needs Cut Auto Production

Armament Plants Furnishing Relief Only Gradually

By WILLIS THORNTON

NEA Service Staff Correspondent

DETROIT — The motor capital, buzzing with activity, blossoming with new plants, and bulging with billion-dollar defense orders, is looking forward to a hard winter with as many as 100,000 unemployed men walking the streets.

his paradox has everybody in the Detroit area shaking his head, and is simply the most striking example of the situation which the National Association of Manufacturers believes may result in three million "new" unemployed during the next six months.

A tour through the new defense plants of the leading motor manufacturers gives some hint of how this sort of thing can happen. To begin with, it must be understood that the defense industries are new industries, built not on top of, or as extensions of the regular auto plants, but new buildings filled with new machinery to build new products, employing to a rather large extent new men who have had to be taught new skills.

Had to Establish School for Workers

The experience, for example, of a body-builder employed many years at some single mass-production operation in the building of auto bodies, is apt to be of virtually no use in an airplane plant. Processes are different—in many cases the very processes themselves have had to be devised for the new job.

Most of these employees in the Briggs airplane plant are new; some have never held jobs before. Yet when priorities restrict production at the body plant between now and the first of the year, only three thousand out of 11,000 employees there will have been absorbed into the plane plant. The others will be handling what is left of the decreased production or be jobless.

General Motors is hiring 5000 men a month in its many defense plants, in which 40,000 are already working. But even that rate of hiring is not sufficient to offset the losses in jobs due to the sudden curtailment in auto production. By Dec. 31, Ford will have increased defense workers from 6500 to 13,500, but despite that expects to have only 60,000 total employment on that date as contrasted with 96,000 last June. The completion of the huge Ford bomber plant at Willow Run, near Ypsilanti, next spring will of course, open the way for employment of many thousands more—but the winter comes between.

Motor manufacturers uniformly insist that they are making every effort to hire their old employees in the new defense plants, but it is the element of timing that makes the trouble. At a time when the first defense orders of the large automobile companies were getting under way, the auto business was still booming, for priorities of materials were not yet in force. There was no need for the priorities then, for the defense plants were not ready for material in quantity. So, many cases, new workers were trained for those new jobs in new plants while the plants were being built and the machinery installed, and while the regular auto workers were still turning out 1941's near record of car production.

Management Is Seeking Solution
When the defense plants were ready for material, then it was necessary to give it to them, forcing curtailment in the automobile plants. But by that time, many new workers had already been trained for the new jobs. Plans, until defense reaches its maximum in the auto industries, perhaps a year hence, the new jobs won't nearly equal the layoffs, even if they were all filled from existing auto workers.

Management of the various auto companies has been working with the United Auto Workers to try to make the changeover as painless as possible. Agreements have been reached to protect seniority of workers who switch from auto to defense plants, to give every possible reference to old, experienced men, and to set up a committee to keep at work on all phases of the problem as they come.

(Continued on page three)

The advent of women workers in defense plants introduces a new factor in industry. These women workers are putting fabric on trailing edges and touching up wings of Vought-Sikorsky fighter planes at the Briggs Manufacturing Co.'s Detroit plant.

SPG Payroll Hits New High

\$200,000 Is Paid 5,000 Employees Thursday

The W. E. Callahan Construction Company, contractor for the Southwestern Proving Ground, moved pay day up a notch Thursday and disbursed approximately \$200,000 to nearly 5,000 employees of the organization, according to an announcement from the payroll department Thursday morning.

Since inception of the defense project the contractor has paid on Friday and no information as to whether the custom of paying on Thursday would become a regular custom could be obtained.

Thursday's payroll was the largest disbursement yet made on the job, exceeding by some \$60,000 the figure for last week's pay.

50-Mile Speed Limit in State

Highway Commission Reduces Limit From 60 MPH

LITTLE ROCK—Seeking to halt Arkansas' rapidly increasing traffic death rate, the State Highway Commission set the following new speed limits Wednesday, effective immediately:

50 miles per hour for passenger vehicles. Old maximum was 60.

45 miles per hour for half-ton trucks and passenger buses. Old maximum was 55.

40 miles per hour for trucks of more than half-ton capacity. Former maximum was 45.

Highway Department workmen will start changing hundreds of highway speed warning signs today. The new maximums will be effective for a 120-day trial period.

"I hope I'm not looking on the dark side, but the traffic problem is becoming a serious thing confronting the state," Governor Adkins told the commission. "I am convinced that speed is the main contributing factor to the fatalities." He recommended that the limit for passenger cars be reduced to 50 miles an hour, and that truck and bus speeds be reduced correspondingly.

The state's traffic toll for the first 280 days of the year (as of Tuesday) numbered 360, compared to 214 deaths during the corresponding 1940 period, an increase of 65.2 per cent.

Commission Chairman J. H. Crain of Wilson said Arkansas's traffic death

Collins Replaced by R. Shelton

Little Rock Man to Handle State Employment Service

LITTLE ROCK —(AP)— Labor Commissioner W. J. McCain Thursday named Roland Shelton, 49, of the U. S. internal revenue collector's staff here as director of the Labor department Employment Security division to succeed Eli W. Collins who was suspended on charges perferred by the commission.

Collins asserted that he could have evaded this inquisition by making a trade with the governor. He said it was a political move and that he was prepared to fight for his job.

Shelton has been in charge of Social Security collection for the internal revenue collector since 1934 and has resided in Little Rock since 1919.

Eli W. Collins, director of the state Labor Department's Employment Security Division since October 17, 1938, was suspended Wednesday by Labor Commissioner W. J. McCain, who said that Mr. Collins has failed to comply with Merit System provisions.

The ouster action, predicted since the 1940 Democratic primary, came only nine days before the third anniversary of a major controversy precipitated by Mr. Collins' appointment to succeed W. A. Roebbery, who had been director since March, 1937.

Mr. McCain said his principle complaint against Mr. Collins was the latter's alleged promotion of 23 probationary employees not selected from the Merit System's civil service register. The promotions caused "unrest" among permanent employees, Mr. McCain said. Names of the 23 were not disclosed.

Another charge, Mr. McCain said, was that Mr. Collins' conduct has been unbecoming to an officer of his standing. The director patronized book makers, and poker games have been played at the division office during noon hours and after work on Saturdays, Mr. McCain said. Mr. Collins admittedly "played the ponies," Mr. McCain said, but became somewhat cautious upon learning that Governor Adkins disapproved of such habits.

Quick Action on Neutrality

President Urges Congress to Revise Act Speedily

WASHINGTON —(AP)— President Roosevelt asserting it was time for the U. S. to "stop playing into Hitler's hands and to unshackle our own" urged congress Thursday to revise the neutrality act to permit the arming of American merchant vessels.

In a special message to congress the President also left the door open for further revision later—possibly permitting ships to travel to belligerent ports and combat zones.

Saying Hitler offered a challenge which we cannot and will not tolerate, Roosevelt asserted, "We will not let Hitler prescribe the waters of world on which our ships may travel."

President of Panama Flees

Pro-Nazi Leader Leaves Country Secretly

PANAMA —(AP)— Panama's reputed Nazi-minded president, Dr. Arnulfo Arias, has fled the country in secrecy apparently under political fire of factions favoring collaboration with the United States.

So secretly did he flee at 5:30 a. m. Tuesday his departure was not revealed until his successor was sworn in Thursday.

Foes accused him of being anti-American and pro-Nazi and were said to have feared his nationalistic policies might jeopardize relations with the U. S.

On the surface there was no other indication other than internal trouble. The country remained quiet.

Masons to Confer Degree Thursday

The Whitfield Masonic Lodge number 239 will hold a special meeting at 7:30 Thursday night at which time degrees will be conferred. All Masons are urged to be present.

Congregational Day at Christian Church

Beginning with the Bible school next Sunday morning at 9:45 o'clock, The First Christian church will celebrate its regular congregational day. An invitation is extended to all friends of the local church.

High Bidders Are Announced on Thursday

Successful Buyers Must Gather All Crops by November 1

Final tabulations had been made and successful bidders announced Thursday morning on the sale of crops and improvements located within the reservation of the Southwestern Proving Ground, according to a statement from the Constructing Quartermaster's office Thursday morning.

Timber standing on the reservation will not be sold. There remain some little crops of a diversified nature that have not been sold and negotiations may be opened with the SFG officials for purchase of this, it was announced.

Figures on bids were not available. The highest bid awarded is understood to have been to A. N. Stroud, of Washington. A partnership bid by Sutton and Gillespie of Hope in a large amount was said to have been accepted.

The successful bidders will start removing the property and other material from the reservation not later than Monday. Deadline for completion of all removal is November 1st. And passes given the bidders will expire on this date.

Following are the names of the winning bidders:

Miss Lucile Allen, C. D. Ross, LeRoy Baker, Thomas F. McLarty, H. B. Gilbert, Paul Dudeney, Joseph Jackson, J. C. Parsons, M. B. Davis, Mrs. Audria Stroud, C. H. Sutton and H. J. Gillespie, Ode Smith, S. H. Smith, James R. Page, Earl King, E. M. Osborn.

L. J. Robins, E. L. Walker, Thomas Thornton, Bert Scott, J. O. Harris, H. N. Rhodes, E. M. Osborn, W. M. Sparks, C. M. Irvin, O. R. and J. K. Green, C. K. Osborn, H. P. Robertson, Mrs. Addie Pope, Paul D. Kennedy, Bruce Rhodes, Bob R. Rowland.

Glen D. Eley, Lee Johnson, Marshall Scott, J. M. Askew, Bert Scott, Ira Flowers, Oscar J. Pate, C. D. Webb, L. J. Robins, Jones Mann, G. W. Kinsey, H. P. Robertson, J. G. Prescott, J. A. Sevedge, W. B. Porterfield, William Draper, L. O. Compton, J. L. Eley, James Leslie, Fred Ball, S. F. Moore, C. W. Williams.

S. H. Kyle, J. P. Haison, C. C. Norwood, W. E. Burke, J. Mark Jackson, E. H. Sutton, J. B. Lewis, Sam Hartfield, L. E. Salisbury, H. E. Sutton, W. T. Bain, John S. Willis, Thomas S. Smith, Lee Johnson, E. A. Long Lucius Carpenter, Seal Florence, E. N. McWilliams, Vincent W. Foster, C. W. Wilson, Jim Wilson, F. E. Russell.

Chinese Begin Big Offensive

Japs Report 80,000 Chungking Troops Attacking

SHANGHAI —(AP)— The greatest offensive of the Japanese army in four and a quarter years of warfare is apparently underway, Japanese army sources said Thursday.

They reported that 80,000 Chungking troops attacked Japanese forces October 3 on all front of central China and said fighting was still in progress north, west and south of Hankow, Yangtze's river port.

The Japanese said the principal Chinese objective was Ichang, which General Chiang Kai Shek ordered recaptured and it was acknowledged that Chinese divisions had occupied some frontal positions there. The Japs said later the positions were recaptured with Chinese losses of 300 dead and 100 prisoners.

Pentecosts to Hold Revival

Campaign to Be Conducted by the Rev. Sweatt

The Rev. Thurman A. Sweatt, well-known in church circles here, will conduct a revival campaign at the First Pentecostal Church, Fourth and Ferguson streets, beginning October 12. The Rev. W. P. Graves, pastor, announced Thursday.

The Rev. Sweatt has conducted two revivals here previously and a large crowd is expected. The public is invited.

Save By Making Careful Choice of Hosiery

Know Your Material Before Buying Is County Agent's Advice

One of the best ways of keeping clothing bills within the budget is the careful selection of hosiery, says Miss Mary Claude Fletcher, county home demonstration agent.

The hosiery bill, usually the most difficult of all clothing accounts to control, can be kept within more reasonable limits by the simple expedient of checking all important points of hosiery selection when the purchase is made, Miss Mary Claude Fletcher says.

Most important points to check in selecting hosiery, whether cotton, silk, rayon or other synthetics, according to Miss Sue Marshall, extension specialist in clothing and household arts of the University of Arkansas College of Agriculture, are weight, size, and length.

"One of the most frequent reasons hose wear out too quickly," Miss Marshall says, "is that the weight of stocking selected is not suited to its use. Usually, it's because the stocking is too sheer for the heavy wear it must get."

"Easiest way to check the weight of a stocking is to put your hand inside it and judge by the looks and the feel. But it is often possible also to check the size of the yarn used in the stocking and the fineness of the knitting. Stocking weight depends on both these factors. In silk stockings, for instance, size of the yarn is often given in the designations 'two-thread' 'three-thread' and so on. The higher the number of threads the stronger the yarn. Fineness of knitting is indicated by gauge number. The higher this number, the finer the knitting."

"Stockings the right size also wear better. For most women, a stocking foot length should be 1/2 inch longer than the length of the foot. Stocking size is the length of the stocking foot in inches. Wool hose usually should be about one-half size larger than other hose, to allow for shrinkage."

"Buying stockings the correct length

Men, Women! Old at 40, 50, 60! Get Pep

Feel Years Younger, Full of Vim! Don't waste your money on run-down feeling pills. Buy Oxtrex. Oxtrex is a little pep pill with Oxtrex will do. Contains general tonic and stimulant after 40 by baking iron, calcium, phosphorus, iodine, Vitamin B1, A, C, E, K, and other vitamins. "I took it myself. It really did me. Special introductory size Oxtrex Tonic Tablets cost only 50c. Ship feeling pep, old. Starts feeling pep and younger this very day. For sale at all good drug stores."

Crochet Hooks to Get Busy

Full Season Seen By Hempstead County Agent

Crochet hooks have a busy season ahead because fashion has decreed that crocheted hats are in the mode for fall, says Miss Mary Claude Fletcher, county home demonstration agent.

With hat styles ranging from the most casual to the ultra sophisticated, Miss Fletcher points out, housewives handy with a crochet hook have an unusual opportunity to provide themselves with striking accessories.

For something different in the accessory line, Miss Sybil D. Bates, extension home industries specialist of University of Arkansas College of Agriculture, suggests hats, large or small, of crocheted felt.

A little ingenuity, several discarded felt hats, a sharp pair of shears and a crochet hook are the only materials needed for the creation of a

stunning topper for fall, Miss Bates says.

The extension home industries specialist suggests the following pointers for amateur milliners:

"Prepare the felt in the hats by cutting it into strips one-eighth inch wide. Start at any point on the crown and continue cutting as if peeling an apple. Wind the cut felt in balls to make it easy to handle. One color may be used or several colors combined in one. Just suit your fancy in this matter of color."

"When the felt is all cut, select your design, one, of course, that will give that swanky appearance sought by all women."

"You need not stop with crocheting

for many interesting hats may be created from a combination of crochet with felt, crochet with velvet, velveteen and suede.

"The sky is the limit in hats when coupled with originality and ingenuity of the producer," Miss Bates says.

Barbs

Our idea of anyone marrying for money is they're not worth it.

National Fire Prevention Week, Oct. 5 to 11, reminds us that the one and only place to keep the home fires burning is in the furnace. Spending of desperate straits, Al-

lied diplomats fear a new crisis in the Dardanelles.

People who think before they speak usually can back up what they say.

Others just back up. The great majority of us will get no place running things into the ground. Let's leave that to the farmers.

BIG ISLAND, Va. —(AP)— Even the chickens are taking this defense business seriously. Mrs. J. E. Manley killed a chicken, cut open the gizzard, and found seven .22 calibre cartridges.

It's a lot better to have that run-down feeling from work than from gossip.

Accidental deaths of persons over 65 are proportionately greater than in all other age groups combined.

Relieves MONTHLY FEMALE PAIN

Desert-Bridge Is Given by Mrs. Thomas G. Rivers Tuesday

An event of Tuesday was the desert-bridge given by Mrs. Thomas G. Rivers at her home on West Avenue D. Preceding the spirited games a delicious desert course was served to the following players: Mrs. Robert McCune, Mrs. Peter O. Peterson, Jr., Mrs. Max Cox, Mrs. Werner C. Strecker, Mrs. Frank Nolen, Mrs. R. M. LaGrone, Jr., Mrs. Comer Boyett, and Mrs. Robert Larsen.

Playing resulted in Mrs. LaGrone receiving the high score gift, Mrs. Boyett, the second high score, and Mrs. Larsen, the consolation.

Mrs. J. G. Martindale was a guest.

Mrs. Roy Stephenson Is Club High Scorer at Tuesday Club Party

At 3:30 Tuesday afternoon the members of the Tuesday Contract Bridge club met at the home of Mrs. Syd McMath for the weekly contract games. Two tables were arranged for playing.

BLUE RIBBON BREAD

AT YOUR GROCERS

and CITY BAKERY

After the games the hostess served "cokes" and sandwiches to the club members and two guests, Mrs. Joe Black and Mrs. William Summerville.

Mrs. Roy Stephenson was the high scorer for the club and Mrs. Joe Black for the guests.

Miss Harder, Mr. Tracy Are Wed On Saturday Morning

Miss Madeline Harder, daughter of Mrs. Susan Harder of Sioux City, Iowa, and William J. Tracy, son of Mr. and Mrs. Phil F. Tracy of Westfield, Iowa, were married at 9:30 Saturday morning at Our Lady of Good Hope Catholic church. The Reverend T. Lillis of Texarkana officiated.

The bride was becomingly attired in a ginger brown costume suit with matching accessories. Her corsage was of tulip flowers.

Miss Nell Cunningham, the maid of honor, wore a brown dress with corresponding accessories. She wore a corsage of tulip flowers.

E. A. Morsani was Mr. Tracy's best man.

Following a short wedding trip to Hot Springs, the couple will be at home at 222 Edgewood, Hope, Arkansas, where the bridegroom is employed at the Southwestern Proving Ground.

Birthday Party for Jacqueline Breeding on 6th Birthday

A gala party was given by Mrs. Dillard Breeding Tuesday afternoon for her daughter, little Miss Jacqueline Breeding, who was celebrating her 6th birthday.

The guests assembled at the home of the grandparents of the honoree, Mr. and Mrs. William Jones, 401 South Fine street, for an afternoon of supervised play.

In all of the decorations and favors a Halloween motif was observed. The beautiful birthday cake was served with ice cream.

Those enjoying the occasion were Joe Don Willis, Sara Leudersback, Dickie Leudersback, Gail Cook, Carolyn Coffee, Sue Willis, Donna Lou Cunningham, Freddie Jones, Billy Way, Sonia Somerville, and the honoree.

Southern District Convention of Woodmen Met in Hope Tuesday

The Southern District Convention, Supreme Forest Woodmen Circle, was held at the Woodmen of World Hall, in Hope, Tuesday, October 7.

The program for the convention was as follows:

Afternoon Session at 1:00 p. m.

Call to Order—Mrs. Dora Meador, President Protem.

Seating of Officers, Presentation of Guests, and Presentation of U. S. Flag—Hope Drill Team.

Song, "America"—Audience.

Invocation—Lord's Prayer in Union.

Welcome Address — Mrs. Lenora

Bearden.

Response—Mrs. Estelle Waterston.

Appointment of Committees.

Initiation—Assisted by Texarkana Drill Team.

Reports of Committees.

Election of District Officers.

Talks—How to Create More Interest in the Groves, By Mrs. Tressie Goldstickler and Mrs. Eva D. Taylor.

Adjournment.

Evening Program at 8:00 p. m.

Presentation of U. S. Flag—Hope, Texarkana and El Dorado Drill Teams.

Song, "God Bless America"—Audience.

Junior Graduation—Mrs. Eva D. Taylor, presiding.

25-year pins, presented by Mrs. Tressie Goldstickler.

Song of Service—Mrs. Maude Carpenter, Texarkana.

Drills by the three drill teams.

Music—W. O. W. Orchestra.

Talks.

Installation of District Officers.

Penny March.

Closing Ceremonies.

W. S. C. S. Circle No. 4 Meets At the Bush Home Tuesday

Members of Circle No. 4 of the Women's Society of Christian Service, Mrs. A. M. Rettig leader, met at the home of Mrs. D. L. Bush Tuesday afternoon at 3 o'clock. Mrs. C. Cook was co-hostess for the meeting.

A helpful devotional was brought by Mrs. Edwin Ward, after which a very interesting program on "Home Mission Projects of the Methodist Church" was presented by Mrs. W. W. Johnson.

Following the regular business session, the hostess served a delightful desert course.

John Cain Chapter, D. A. R. Hold Monthly Meeting

Mrs. J. G. Martindale, regent, presided at the October meeting of the John Cain Chapter, D. A. R. of Hope, and introduced Mrs. J. J. Battle who led the salute to the flag and the American flag, which were followed by the impressive ritual of the organization.

Preceding the business session luncheon was served at the Hotel Barlow with Mrs. Gus Haynes, Mrs. Charles A. Haynes and Miss Mary Haynes as hostesses. The regent's place was marked by a beautiful corsage, as was that of Mrs. M. C. Thompson, a guest, who is a member of the Caroline Scott Harrison Chapter of Indianapolis, Indiana. Other guests were Mrs. Terrell Cornelius, Mrs. C. McNeil and Mrs. Syd Henry. Mrs. J. M. Houston was welcomed back into the Chapter, while Miss Mary Haynes was introduced as the newest member and welcomed by the regent with the impressive ceremony designed for such occasions, which terminates with the presentation of an American flag to the members.

Mrs. E. F. McFaddin, secretary, read the minutes of the previous meeting and told of her work as chairman of the local Children of the American Revolution organizations in the grade schools of the city. She reported an Executive Board meeting, the recommendations of which were unanimously adopted.

Mrs. Martindale recently attended the State Board meeting, Arkansas Society, D. A. R., and reported the activities which have been continued by members of the local Chapter during the Summer, despite the fact no regular meetings have been held since in June. The Chapter is endeavoring to preserve the records on the tombstones in cemeteries of the Southwestern Proving Ground, a type of work urgently stressed by the National Society, D. A. R.

Mrs. J. J. Battle, past regent, told of her work along patriotic education lines in both white and colored schools of the county.

Mrs. R. E. Cain reported that John Cain Chapter now has twenty-seven members. Provisions have been made to permit members of other Chapters, residing temporarily in Hope, to participate in the activities of the local Chapter upon presentation of proper credentials.

Mrs. Gus Haynes gave the message of the President-General, which was unusually appropriate for the needs of the present time.

Mrs. C. C. McNeil accompanied at the piano during the singing of several songs and played "The National Defense March," which has been dedicated to the Daughters of the American Revolution by the composer, a member of the Oswego, N. Y., Chapter.

D. A. R. emblems, used on the float sponsored by the Chapter in the patriotic parade of July 4, have been presented to the Chapter by Mrs. E. R. Johnson.

The regent announced that John Cain Chapter members assist every third week in filling out questionnaires at the headquarters of the local draft board, sharing this work with other patriotic and professional groups.

The new year books were distributed.

SKIN IRRITATIONS OF EXTERNAL CAUSE

acne pimples, bumps (blackheads), and ugly broken-out skin. Millions relieve themselves with simple home treatment. First touch of Black and White Ointment goes to work at once. Start Planning Winter Meals

Suggests Changes for Potato-Bean Routine

Wives weary of the familiar plaint that winter menus are merely a variation of "potatoes and beans today and beans and potatoes tomorrow" will forestall future repetition of this lament by planning now to add variety to cold-weather meals, says Miss Mary Claude Fletcher, county home demonstration agent.

Winter meals frequently become monotonous, Miss Fletcher says, because there is nothing "coming on" in the garden or orchard to make frequent menu changes possible.

By spending a little time now, however, in planning the distribution of winter food supplies, checking over the herb shelf, and planning winter meals, housewives will have little trouble in keeping the family happy with varied and interesting meals after the snow flies, the home demonstration agent declares.

Among the ways canny cooks can keep the family eager to hear the dinner gong, according to Miss Mary E. Loughhead of the University of Arkansas College of Agriculture, are using canned and stored goods so they will be rather equally distributed over the winter months, preparing the same food in different ways, using different combinations of foods in meal plans, supplementing food supplies by the purchase of foods not found on the pantry shelf, and using herbs and flavor foods.

Often times the Extension specialist in foods and nutrition says, the difference between uninteresting ordinary dish is a bit of garlic, a dash of savory, thyme, or curry, or a bit of sage, celery seed, onion or dill. The right pickle or relish with meat or a salad often means the difference between a dull and an interesting meal, Miss Loughhead says.

Variety in the winter menu, however, the Extension specialist declares, is best assured by the production of many kinds of vegetables and fruits and preserving them by a variety of methods.

Mrs. Shirley Stewart, County Council President, Mrs. Robert Ridder, Council Reporter, Mrs. Early McWilliams, county food and nutrition leader, Mrs. Eli Kidd, Mrs. O. E. Foster, Mrs. Sid Skinner, Mrs. J. L. Eley and Mrs. John Allen, food preservation leaders of the county and many more of the 1500 Home Demonstration Club women and co-

monstrators of the county with their pantries stocked with hundreds of different kinds of fruits and vegetables. These women will find winter menu making a simple procedure, Miss Fletcher, Home Demonstration Agent, says. The pantry shelf includes canned vegetables of all types, canned fruits, preserves, jellies, canned fruit juices, pumpkins, peanut butter, relishes, pickles, sandwich spreads, mince meats, chickens, beef, pork, dried vegetables and fruits.

Other pantry stores which will add variety to their menus this winter, Miss Fletcher, Home demonstration agent, says include root vegetables such as turnips, carrots, cured meats, peanuts, walnuts, hickory nuts, pecans, honey and sorghum molasses.

Whole grain cereals as whole grain corn meal hominy, and whole wheat flour will add vitamins to the family menu.

Dr. and Mrs. O. J. Wade of Conway were Tuesday and Wednesday guests of their daughter, Mrs. Jess Davis, and Mr. Davis.

Mrs. Annie Mae Hutchinson and Mrs. Alma Key have returned to their home after an extensive tour of California.

County Library Board Meets

Report on Activities Discussed by Group

The Hempstead County Library Board met Wednesday afternoon at 4:30 p. m. at the city hall with Charles Reynerson, chairman, presiding.

Mrs. J. R. Henry, secretary read the minutes of the last meeting. Miss Elsie Weisenberger, Hempstead County Librarian, gave a years report of circulation of books and magazines throughout the county. 120,865 books and magazines have been circulated in the six county units located at Hope, Washington, Fulton, Spring Hill, Blevins, and Columbus. 4,133 barrowers are registered throughout the county. 5970 of these are school children. 13 schools have checked books from the library.

The Hempstead County Library consists of 6558 volumes of books, 3004 of these were added in the past 18 months through state aid. The library subscribes to 11 daily newspapers and 23 magazines. Reynerson gave a financial report for the past year.

Mr. Reynerson and Mrs. Henry were selected to serve as chairman and secretary for the next year. Other members of the board are J. L. Leihning, superintendent of schools at Fulton; Robert Turner, teacher at Spring Hill; Miss Mary Catts, Washington, answered roll call in the absence of Bob Levens, business man at Washington; R. W. McCracken, superintendent of schools at Blevins was appointed Monday by Judge Fred Luck to serve the unexpired term of A. B. Weatherington who resigned in the summer to except a position as superintendent of schools at Maivern.

Financial problems were discussed for the coming year but no direct action was taken. The next meeting will be held Tuesday, October 21, at 4:30 p. m. at the city hall.

New Defense Jobs Absorb Some Unemployed

Much of the unemployment Detroit and other centers fear this winter will be temporary.

When a plant shuts down for lack of material, either in whole or in part, the men laid off are laid off in a bunch. They are all unemployed at that moment. The new defense industries are creating new jobs at the rate of 10,000 a month, and of course many of those displaced in the auto shops will be absorbed into the new jobs after delays of various lengths. Some effort is already being made to extend unemployment compensation from the present 16 weeks to 26 weeks to help workers through this period of dislocation.

Ultimately, the new defense industries piled on top of the old auto industry, would of course mean more jobs than ever before. But the hard defense is pushed, the more material must be allocated to defense uses, and the more immediate shut-downs will follow in normal industries. Only when the supply of basic metals and materials, or the development of substitutes, is sufficient to supply both will the "priorities unemployment" be eliminated.

50-Mile Speed

Hose, Shoes Go Together

Take Fashion Long Time to Get Feet, Legs Together

By HELEN FORRIST HALL, AP Fashion Editor

It has taken the fashion world a long time to get feet and legs together, but now we have a shoe-and-stockings wardrobe in which stockings match or harmonize with the new colored shoes.

A store which claims it does the

largest quality shoe business under one roof has just presented a showing of 85 color-embroidered shoe and stocking fashions. A purple satin high-top clog, tied high above the ankle in lavender ribbons, with silk stockings dyed to match, struck the only too-too note.

Red stockings, matching shoes or trims, and blue stockings, somehow didn't appear to advance like the greens, whites and browns. But it was demonstrated that white cotton stockings, which your husband may think he doesn't like, can look smart—especially in mesh, assembled with bright red low-heeled shoes having black molded sole.

Cotton With Lacy Clocks
Cottons, incidentally, were shown in a variety of meshes and laces, with tailored or lacy clocks frequent.

Black cherry silk stockings were in perfect harmony with bronze kid shoes. Again, fine cotton mesh hose in khaki was worn with bronze shoes. String, butter-brown and rose-nude were other colors.

Tall girls and shorties get a break in the exciting shoe designs. Think nothing, little ones, of wearing a five-inch heel—the platform sole may be so thick that your heel and toe are almost level. A tall girl may wear low-heeled dress shoes or no heels at all, if she's comfortable that way.

Comfort-seeking fashionistas may look to new styles that are molded to the foot for glove-fit appearance. These include a sports shoe with molded sole. Priorities helped make this revolutionary shoe, for the pretty, soft sole is welded on to eliminate hard-to-get nails.

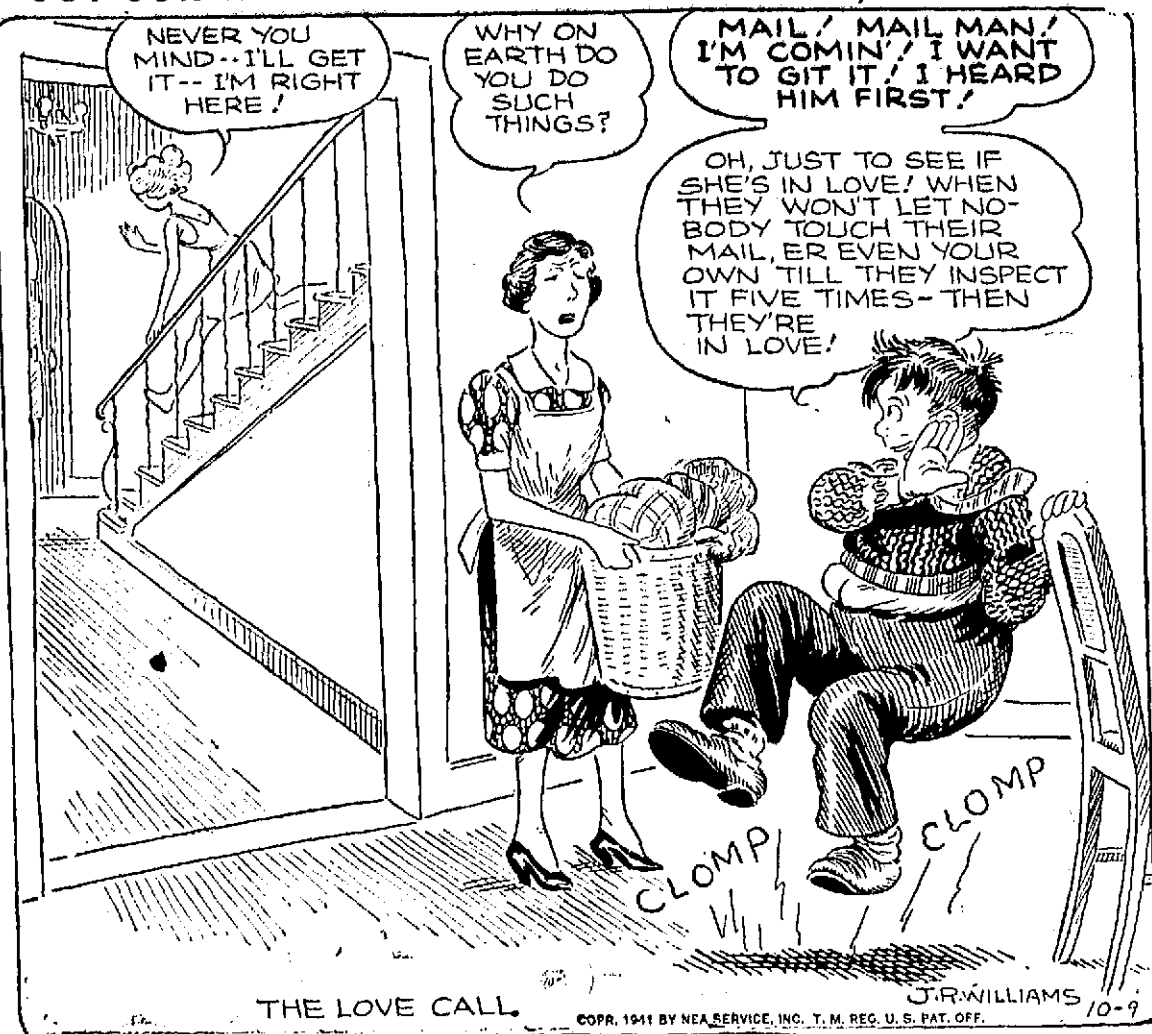

The Moccasin Styles
Bidding for popularity is a low-heeled, hand-sewn dress shoe with moccasin front, hand crocheted trim.

Street booties come in suede, elasticized to glove-fit comfort, with open back. High in front, these may have a turn-back cuff of satin, or a leopard button trim.

Among the moccasin types there are casual sports shoes, achieved by use of unlined leathers. An antiqued calf moccasin oxford, unlined and with platform sole, was shown with beige cotton lisle stockings having a tailored clock. Very new is a dancing moccasin in suede with metallic kid ankle-strap and trim and a flat-on-the-floor look.

Sneaking clogs, designed by Dominic LaValle and popularized by South American women, have nearly five inches in sole and very little shoe

THE LOVE CALL

COPY, 1941 BY NEA SERVICE, INC. T. M. REG. U. S. PAT. OFF.

Edson in Washington

Where Plant Site Board Plants Sites

WASHINGTON — One of the more important but less publicized activities of the Office of Production Management has been the work of the Plant Site Committee of six men whose job it has been to say where and where not the new or expanded

factories of the defense production machinery would be located. The committee meets once a week, ordinarily, and has on its weekly agenda anywhere from 15 to as high as 35 new projects to consider. It has had to work pretty much on the

q. t. because of the terrific pressure brought on it from local interests, but so far it has been able to function without any of its members being assaulted. Original chairman of the group was Donald M. Nelson, but the chief now is Nelson's successor, purchasing director in OPM, Douglas C. MacKachie. Other members are ex-Gov. Clifford Townsend of Indiana, now special adviser on agriculture; Eli Oliver, special assistant on labor; E. F. Johnson of OPM's production division; John Whitaker of the Division of Contract Distribution; and Admiral W. H. Standley of the Production Planning Board.

Organized only last April, the Plant Site Board has since then ruled on the locations of more than 350 new plants and expansions for the defense effort. The board was a little late in getting organized, but it was finally brought into being in an effort to check the tendency to locate new plants haphazardly in concentrated industrial areas.

Aid Aplety
The board now has veto power on all proposed locations and on the positive side it has plenty of volunteer help in the way of chambers of commerce, congressmen and governors, all of whom are sure their particular community has just the resources needed for every new factory under consideration.

To avoid concentration of too many industries in any area, and as a simple matter of defense strategy, the board set up an interior area of the United States within which it was good military sense to locate defense industries such as powder mills, plane factories and ordnance works. Roughly, this area is bounded by a line drawn some 250 miles inland from the border.

The line varies a little in the northeastern quarter, taking in practically all of West Virginia west of the mountains, then running north west to a point on Lake Erie between Buffalo and Cleveland to include the Pittsburgh steel area. The line then follows the southern shore of Lake Erie, includes the Detroit and southern Michigan auto production area, southern Wisconsin, southern Minnesota, and so on west. The line is not a hard and fast boundary, but a flexible guide-line that attempts to set up this interior defense area which a potential enemy would have to penetrate in order to knock out defense production and service of supplies.

Locating new plants on the seaboard would obviously make them that much more vulnerable to attack, but the more important point is that manufacturing is already pretty well concentrated along the coasts, particularly in the New England-New York-New Jersey area, and the available labor and resources supplies in some areas were already straining from over-demand.

Faced With Facts
When the Plant Site Board meets now to consider the location of some new industry or the expansion of an old one, it has before it full data on the labor supply, utilities, transportation, housing reserve, proximity of raw materials, availability of ample sub-contracting facilities and, finally, the need of the section for new industries.

No one can make any sure predictions as to what's going to happen to all this increased productive plant capacity when the defense effort is over. Some may be converted into useful civilian production. Others will have to be maintained as defense plants for possible future emergencies. Some may have to be scrapped.

In that respect, the building of new plants, at no one knows exactly what total costs, may have been a wasteful effort.

The point is made, however, that not every existing factory producing for civilian consumers can be economically converted to defense production. That is one of the weaknesses of the argument in favor of compulsory sub-contracting or bits and pieces production. England followed both these patterns and by some reports lost 50 per cent productive capacity in so doing.

factories of the defense production machinery would be located. The committee meets once a week, ordinarily, and has on its weekly agenda anywhere from 15 to as high as 35 new projects to consider. It has had to work pretty much on the

The board was a little late in getting organized, but it was finally brought into being in an effort to check the tendency to locate new plants haphazardly in concentrated industrial areas.

Aid Aplety
The board now has veto power on all proposed locations and on the positive side it has plenty of volunteer help in the way of chambers of commerce, congressmen and governors, all of whom are sure their particular community has just the resources needed for every new factory under consideration.

To avoid concentration of too many industries in any area, and as a simple matter of defense strategy, the board set up an interior area of the United States within which it was good military sense to locate defense industries such as powder mills, plane factories and ordnance works. Roughly, this area is bounded by a line drawn some 250 miles inland from the border.

The line varies a little in the northeastern quarter, taking in practically all of West Virginia west of the mountains, then running north west to a point on Lake Erie between Buffalo and Cleveland to include the Pittsburgh steel area. The line then follows the southern shore of Lake Erie, includes the Detroit and southern Michigan auto production area, southern Wisconsin, southern Minnesota, and so on west. The line is not a hard and fast boundary, but a flexible guide-line that attempts to set up this interior defense area which a potential enemy would have to penetrate in order to knock out defense production and service of supplies.

Locating new plants on the seaboard would obviously make them that much more vulnerable to attack, but the more important point is that manufacturing is already pretty well concentrated along the coasts, particularly in the New England-New York-New Jersey area, and the available labor and resources supplies in some areas were already straining from over-demand.

Faced With Facts
When the Plant Site Board meets now to consider the location of some new industry or the expansion of an old one, it has before it full data on the labor supply, utilities, transportation, housing reserve, proximity of raw materials, availability of ample sub-contracting facilities and, finally, the need of the section for new industries.

No one can make any sure predictions as to what's going to happen to all this increased productive plant capacity when the defense effort is over. Some may be converted into useful civilian production. Others will have to be maintained as defense plants for possible future emergencies. Some may have to be scrapped.

In that respect, the building of new plants, at no one knows exactly what total costs, may have been a wasteful effort.

The point is made, however, that not every existing factory producing for civilian consumers can be economically converted to defense production. That is one of the weaknesses of the argument in favor of compulsory sub-contracting or bits and pieces production. England followed both these patterns and by some reports lost 50 per cent productive capacity in so doing.

Cozy Comforts for Winter

You Can Beat Rising Prices by Utilizing Native Wool

With winter just around the corner, now is the time to begin thinking about cozy comforts for winter nights, says Miss Mary Claude Fletcher, county home demonstration agent.

Following up that reminder, Miss Fletcher suggests that thrifty homemakers who wish to avoid the rising prices of consumer goods in supplying the family with quilts and covers may do so by utilizing native wool.

Only six pounds of raw wool are needed to make a comfort that will keep the children warm and comfortable on wintry nights, says Miss Sybil D. Bates, Extension specialist of the University of Arkansas College of Agriculture, who recommends the following procedure for transforming the raw wool into light warm comforts.

Before it is ready to be made into comforts the wool will have to be washed and carded.

Prepare the wool for washing by pulling it with the finger tips to loosen the dirt and trash which can then be removed by a brisk shaking. Place the loosened wool in a tub of lukewarm sudsy water made with mild soap. Strong harsh soap harms the wool fibers and should never be used. Let the wool stand 10 to 20 minutes in the first suds then remove to a second tub of lukewarm suds and allow to stand 10 to 15 minutes.

Place in a third suds for five minutes and then rinse in three waters that are the same temperature as the suds. (It must be remembered extreme changes in temperature will mat and felt the wool fibers.)

To dry the washed wool, spread it out so that air may circulate freely around it. A satisfactory drying apparatus can be made by stretching a sheet in quilting frames as if preparing the lining of a quilt. Spread the washed wool on the sheet and leave to dry.

When the wool is thoroughly dry,

card into hats using wool cards. Carded hats may be placed between cheese cloth and quilted, then covered with any type of covering desired, or it can be placed directly in the covering and quilted. If a quilted cheese cloth hat is made, it will not be necessary to quilt the outside cover. It may be tacked with wool or cotton thread.

Finish the edge of the comfort by turning the edges 1/2 inch to the inside and stitching 1/8 to 1/4 inch away from the edge. This gives a tailored decorative finish.

More detailed information on making wool, down and feather comforts has been prepared by Miss Bates in leaflet form and is available at the county Extension office the home demonstration agent advises.

McCaskill

Mr. and Mrs. E. W. Cullpepper left Thursday for Pueblo, Colorado where they will make their home in the future.

Miss Jean Shuffield of Magnolia A. & M. College spent this week-end with her parents Mr. and Mrs. R. G. Shuffield.

Mr. and Mrs. John Gould visited relatives in Murfreesboro Sunday.

Miss Lola Wortham of Prescott was the Friday afternoon guest of Mrs. Dora Wortham.

Mrs. Chester McCaskill and Miss Janelle McCaskill were Hope visitors Saturday.

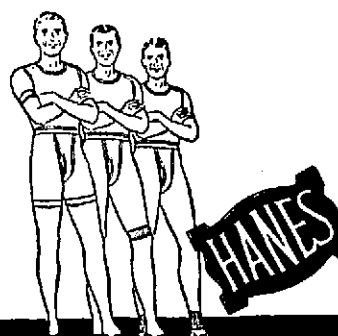

Mr. Harold Gorham of Longview, Texas was the week-end guest of his mother, Mrs. M. O. Gorham.

Mrs. Claud Bradley and Mrs. Dora Wortham were visitors in Hope Tuesday.

Mr. and Mrs. D. W. Martin and Mrs. George Hood made a business trip to Little Rock Monday.

Mr. and Mrs. G. W. Anthony and daughter Bonnie, and Miss Young and Miss Sanders, were visitors to El Dorado Saturday.

Mrs. Bill Hood and Mrs. Chester McCaskill attended a P. T. A. meeting at Hope Monday.

GET SET FOR COOLER DAYS

Some morning in the next few weeks, you'll wake up and find it's cold outside—uncomfortably so for summer underwear. Why not buy your HANES WINTER SETS now? These popular garments are mid-weight. You're warm enough outdoors without baking indoors. The HANESKINT Crotch-Guard provides gentle athletic support. All-round elastic waistband. No bothersome buttons. See your HANES Dealer.

HANES WINTER SETS
Choose the set you like. Wear a short-sleeve or sleeveless shirt with the mid-high, knee-length or ankle-length Crotch-Guard Drawers. All cotton (combed) or cotton-wool mixtures. P. H. HANES KNITTING COMPANY Winston-Salem, North Carolina

Planting of Seed Patches Is Advised

Farmers Can Save Money By Conserving Seed This Fall

Farmers in Hempstead county can plant seed patches this fall. Oliver L. Adams, county agent, has announced. Seed of white clover and hop clover, two of the most expensive of common seed bought in Arkansas, crimson clover, and bur clover can all be saved at home if proper planting and harvesting precautions are taken, he declared.

Elaborate and expensive machinery is not necessary for saving small quantities of any of these seed, but, the county agent pointed out, if seed are

to be saved next spring they must be planted this fall. In planting a seed patch, the first thing to be considered is the place. The seed patch must be well drained, moderately productive, and free of weeds or brush that would hinder harvesting. Charles F. Simmons of the University of Arkansas College of Agriculture advises. In all cases the land should be broken and a good seedbed prepared if possible. Triple superphosphate, at the rate of 100 pounds per acre, should be worked into the seed bed and then the seed planted.

For a seed patch the rate of seeding should be much higher than for pasture seeding. Mr. Simmons said. Both white and hop clovers should be seeded at the rate of 6 pounds per acre, crimson clover at the rate of 15 to 20 pounds per acre, and bur clover at the rate of 10 bushels per acre. All the seed except bur clover must be inoculated if the seed patch is to be a success.

On most farms well-rotted manure should be applied to the seed patch at the rate of 3 to 5 tons per acre. Because of the tough seed coat of bur clover, the Extension agronomist said that seed planted this late should probably be treated with the hot-water method. This method is described in the Arkansas Extension Circular 423, "Bur Clover," which may be obtained from the county agent.

T. S. McDavit and A. W. Stubbeman have planted 72 acres to bur clover from seed produced on their home farms. These plantings are up to a fine stand. The McDavit farm is in Terre Rouge creek bottom to the left of highway 67 five miles out of Hope. The Stubbeman farm is near Alton south of Hope.

CAN'T KEEP GRANDMA IN HER CHAIR

She's as Lively as a Youngster—Now her Backache is better

Many sufferers relieve nagging backache quickly, once they discover that the real cause of their trouble may be tired kidneys. The kidneys are Nature's chief way of taking the excess acids and waste out of the body. They help most people pass about 3 pints a day.

When disorder of kidney function permits poisonous matter to remain in your blood, it may cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up at night, swelling, puffiness under the eyes, headache and dizziness. Frequent or scanty passages with smarting and burning sometimes show there's something wrong with your kidneys or bladder.

Don't wait! Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

FRECKLES AND HIS FRIENDS

MURDER IN PARADISE

By MARGUERITE GAHAGAN

THE STORY: Friendly, high-spirited Maudie O'Connor, her school teacher daughter, Mary, enjoy a week of quiet vacation at Paradise Lake before their discovery of the murdered body of sophisticated Herbert Cord smells trouble. Instead of phoning the police from elderly Chris Gordon's inn, Maudie goes on to the home of Miss Millie Morris and the pretty niece, Jeanie Morris, whom local reporters had believed to be Cord's wife. The next day, Maudie and Jeanie had reason to hate Cord. Mary, the next day, wonders about a lucky piece her mother has acquired.

MARGIE VS. JEANIE

CHAPTER IV
IT was just as well that I had come for the mail because the little white frame inn on the beach at the end of the grove was anything but a scene of rustic quiet. The room where one could get ice cream and pop was doing a rushing business. Cottagers who ordinarily only came on a Saturday night were there now and it wasn't even noon. Maudie would have had a field day. I shuddered to think of the dynamite she might have planted.

I collected the papers and some letters and started out when Dr. Orway got up from a table near the door and came toward me. We sat down and he asked me how I felt.

"My knees still shake when I think of last night," I confessed, "and being only human, I'm wondering about a lot of things. This is my first contact with a murder and I don't think I enjoy it, but my feminine curiosity is bothering me."

"We're all curious," he said with that old-fashioned country doctor courtliness that went with his bushy iron gray hair and kind but piercing gray eyes.

"Murder," he said briefly. "He was shot. The police have the bullet and it will be examined, but until they find the weapon they won't have much to go on. A nasty business," he added, shaking his head.

"Did he have any known enemies?" I tried not to act too curious.

"He's been coming here for about three years, but despite that no one seems to know a lot about him. He was congenial—liked to fish; sailed a bit in the races when someone wanted an extra man; danced, which made him popular with the women; played a good game of cards; and was accepted because Jeanie cared for him."

"Well, Jeanie must have known him better than anyone else around here—that is, except Miss Dixon, who's collapsed. Made a

lot of wild accusations. Hysterical, of course, but damaging."

"You mean things that would involve Jeanie?" My hunch had been right, then. That brown-haired child with blue eyes would be hurt.

He nodded. "I've known her since she was a little girl in pig-tails," he said. "Miss Millie was always a strict woman. Well intentioned, but she never remembered that girls grow up and want something besides weekly teas with a group of old people." He pulled out his old-fashioned silver watch and looked at it. "Going to the inquest, I suppose?"

I SAID I hadn't been told to go, but I supposed both Maudie and I would be called since we had found the body. He left then, but I stayed a few moments, sipping my gingerale and listening to the broken threads of conversation around me.

"You heard them arguing," a pretty girl, deeply tanned, said. "I was right there with you. Herb wanted to invite Jeanie to a picnic and Margie was planning. Jeanie was in the other room buying some cigars and Margie was telling Herb not to ask her to go. I remember she said to him, 'What are you trying to do, play one against the other?' Herb laughed and asked her if she was jealous and Margie certainly didn't think that was funny."

The rest of the crowd at the table nodded in agreement. "Then Jeanie came back," she continued, "and Herb asked her if she could be ready by 10 o'clock. . . . Why, that would be this morning, wouldn't it? Jeanie looked a bit surprised, and before she could answer Margie told her off."

"I hope you won't think I'm rude, dear," she said in that drawling tone she uses when she wants to impress us, "but I sort of want to impress us, but I sort of want Jeanie to go white, and Herb became simply furious. I'd never seen him really mad before, but he was mad then and he and Margie said some nasty things to each other and Jeanie stood a moment just looking at them. Then she went away. She never said a word, but she didn't look like herself, and of course she knew everyone had heard what they had said."

And everyone had heard what the tanned, leggy thing had said, too, I decided, looking around the room.

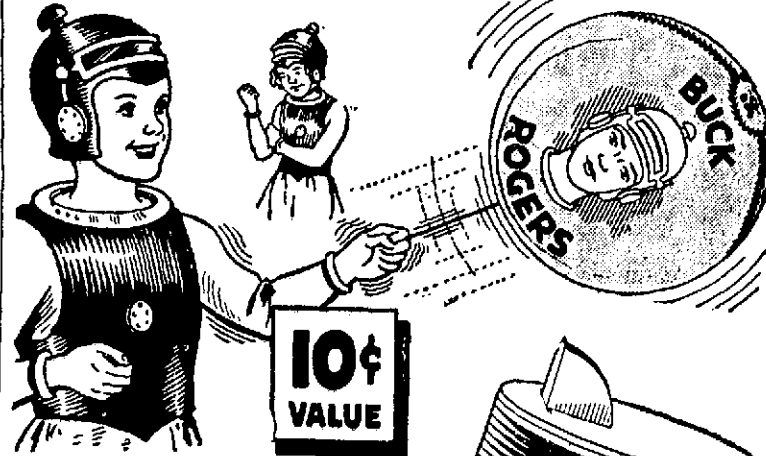

"Miss Millie'll put the clamps on her tighter than ever after this," one of the boys said.

"Say, maybe the old woman's breaking down," another of the

where good seedbed preparation is not practical. If seeding on lespedeza stubble, the land may be disked and the oats drilled in or broadcast and

part, I found everybody very cooperative—especially in the Army and Navy."

The delay in getting the USO recreation drive under way has been one of the mysteries of the capital. The subject of army morale has been widely discussed. Editorials, articles and speeches on it have been included in the Congressional Record almost daily.

Still, no one has taken it very seriously for very long. Not even those politicians who seize on anything for a cause. Why? I asked an Army official, a veteran of World War I.

There are, he told me, two definite sides to this question and besides, almost any politician knows that the quickest way to raise a group's morale is to go about shouting that it is dragging bottom.

"Ten Times More Enjoyable" Perhaps he is right. Typical of the conflicting stories that have poured into Washington are those which grew out of an investigation of a Massachusetts camp. The investigation indicated a morale so minus as to be alarming. Then a private, who had been in the camp nearly ten months, sat down and composed a piece which was written into the Congressional Record.

"Any one who snoops around a town of 28,000," he said, in part, "can find rumors about everyone from the mayor to the street cleaner. . . . And the same goes for a camp of 28,000 soldiers."

"Just give a soldier a chance to gripe, just give him the right conversational lead, and he'll tell you a swell story. It's the fashion. It's just as much a military custom as saluting—and ten times more enjoyable."

That, mind you, came from one of the "down-trodden" privates. It isn't an isolated expression either.

It may be an explanation of why national defense bigwigs have been more concerned generally with other matters and are more inclined to let the Army and urban centers in camp areas work out the problems of morale. It even may explain why government officials weren't prodded a little sooner into relieving Mr. Dewey of that \$11,000,000 gunny sack he was holding.

Reformer says every girl in short skirts is in danger. Yet every man looks after her.

"Oh, things always turn up," I said. "Once they learn about the man—I mean his background—why, the police usually get a lead."

I sounded very smug and knowing. "I mean in other murders that's the way it works out. They always find clues—insignificant things we wouldn't bother with."

He didn't seem disposed to talk and he still hadn't answered my question about Margie Dixon. I suppose he had been pestered by dozens already today and I felt a little ashamed at my own display of curiosity. Maudie herself couldn't have been more nosy. I thought, going back to the cottage, but I didn't have long to consider my own reactions because when I arrived I found Maudie giving an interview to a young man. She was telling him all about her discovery of Herbert Cord's body.

(To Be Continued)

Dewey Arrives in Washington

Helps USO Drive Far Exceeds Its Goal

By JACK STINNETT
WASHINGTON — Thomas E. Dewey, who not so long ago had at least a toe-hold on nomination for the presidency, came to Washington the other day to cut himself a slice of red tape.

Along in the spring he was selected chairman of that drive to raise \$11,000,000 for the United Service Organizations—the community chest for recreation in the armed forces. Dewey did his part and the money topped the goal.

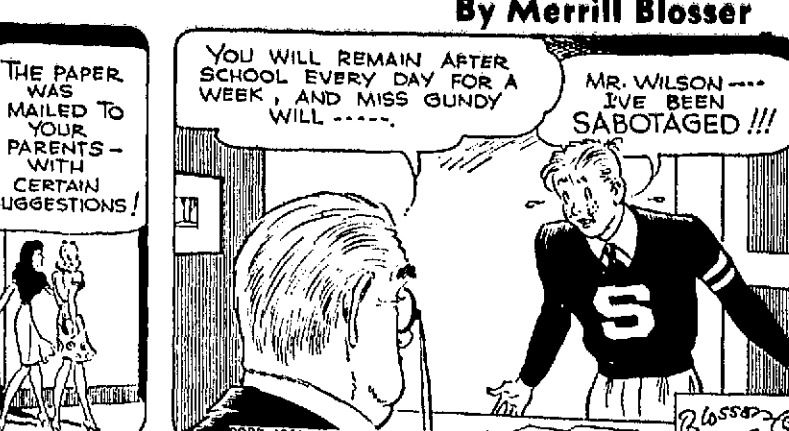

The government had sponsored the idea and agreed to furnish off-the-reservation housing for the USO. In to the national defense housing bill for \$120,000,000 went provision for building 225 USO cottages. The bill passed and John M. Carmody's federal works agency was given administration.

So what happens? Nothing, says Dewey. With no contingents built and no word to get a lot of complaints. What was happening with all that \$11,000,000?

That's why the former presidential aspirant came to Washington to snip a little red tape. He wouldn't tell how he did it, but he did say that "I think everything will be all right from now on. I just called a few people and saw a few more. For the most

and covered with a cultivator using small plows. On many farms the more productive land may be planted to barley for pasture and grain. Since barley may be planted two weeks after the latest recommended date for planting oats, barley may be planted where it is too early to plant oats, planting at the rate of six pecks per acre. Recommended varieties are Missouri, Early Beardless, Tennessee Winter, and Winter Cultural practices and fertilizer recommendations for barley are similar to those for oats.

He didn't seem disposed to talk and he still hadn't answered my question about Margie Dixon. I suppose he had been pestered by dozens already today and I felt a little ashamed at my own display of curiosity. Maudie herself couldn't have been more nosy. I thought, going back to the cottage, but I didn't have long to consider my own reactions because when I arrived I found Maudie giving an interview to a young man. She was telling him all about her discovery of Herbert Cord's body.
